

Danya Yudin

Full-stack / Frontend Developer (Next.js / React / TypeScript)

Saint Petersburg, Russia | sabraman@ya.ru | Telegram: @sabraman | GitHub: github.com/sabraman | Portfolio: sabraman.ru/work

Profile

Frontend / full-stack developer with a strong product, UI, and brand design background. I came into frontend through visual design, so I care about typography, composition, motion, and product feel as much as implementation. I mostly work with **Next.js, React, TypeScript, and Node.js** and usually take a product from interface work to integrations, admin flows, reporting, and release. The work I know best is Telegram mini apps and bots, internal tools, AI-powered search, and PDF / print workflows. Currently freelancing and open to new product, frontend, and Telegram Mini App work.

Key Skills

- **Next.js, React, TypeScript, Node.js**
 - **Telegram Mini Apps, Telegram Bots, REST API integrations**
 - **Admin panels, internal tools, reporting workflows**
 - **AI search, Tailwind CSS, product UI, Figma**
-

Work Experience

VAPARSHOP | Designer & Developer

June 2024 – March 2025 | Saint Petersburg

- Build internal tools and Telegram products for day-to-day retail operations.
- Shipped **Price Tag Generator** to automate price tag generation and print export.
- Built Telegram bots for reporting, operational workflows, and sales conversion tracking.
- Developed a Taplink alternative in **Next.js** with blog modules, location pages, and interactive widgets.
- Built a **Telegram Mini App** in Next.js with GetMeBack API integration, QR scanning, phone search, shift tracking, reporting, and a built-in mini LMS.

HORNY PLACE | Visual Designer & Developer

October 2022 – May 2024 | Saint Petersburg

- Developed a **Next.js** Taplink alternative with **Ticketscloud** event integration.
 - Worked on digital and offline brand touchpoints: signage, promo materials, presentation assets, and lightweight web surfaces.
 - Organized the brand book and reusable visual materials.
-

Selected Projects

Price Tag Printer | Full-Stack Retail Tool

- Built a Next.js tool for generating price tags from Excel and Google Sheets with bulk editing and export to PDF and HTML.

SMO TG Miniapp | Telegram Commerce

- Shipped a Telegram mini app for retail and wholesale ordering with role-based flows and MoySklad integration.

PLONQ AI Search | AI Product Discovery

- Built AI-assisted product search using hybrid semantic and keyword retrieval with similarity-based recommendations.

PSP Book Reader | Native Reader for Sony PSP

- Developed a native EPUB reader in **C/C++** and **SDL2** with caching, chapter navigation, and power-aware performance tuning.
